U.O.No.107/TAD A i dated 7-9-32 — No. 101/SH

Returned with compliments. — 8/9/32

The monthly average expenditure out of the Permanent Advance under "Contingencies and Mineral Survey" is Rs. 196/- based on the actuals of 1931-32. The grants under these heads during the current year have been reduced. If the bills for the charges relating to "Library and Laboratory" are as per rules sent for preaudit, a permanent advance of Rs. 300/- will be quite sufficient to meet the requirements of the Department.

~~xxxx

meet the requirements.

Even in the current year's budget grant, Rs.2,000/- has been provided for "Mineral Survey and Prospecting Work". For the proper conduct of this work and the winning of graphite for the Mysore Iron Works, supply of raw materials to the Government Porcelain Factory and the like, and for the Geological work and inspection of mining areas by the officers of the Department, the imprest of Rs.500/- is found to be hardly sufficient. However, efforts are being made to manage with this sum alone. But a reduction in this amount would inevitably result in seriously handicapping the efficient working of the Department.

Under these circumstances, I beg to request that Government may be pleased to order the retention of this office imprest at Rs.500/-

I have the honour to be,

Sir,

Your most obedient servant,

A. M. Sen

Offg. Director,

Mysore Geological Department.

Geol 27-32-3.

To

D. Srinivasa Iyengar, Esq., B.A.,
Secretary to the Government of
His Highness the Maharaja of Mysore,
Development Department, Bangalore.

SIR,

With reference to your letter No.D.1408/Geol.27-32-2 dated 28th September 1932 enquiring whether in view of the average expenditure out of the Permanent Advance of this office for contingencies etc. being Rs.196/- per month during 1931-32 and the grants under the several heads having been reduced in the current year, an imprest of Rs.300/- will not suffice, I have the honour to state as follows:-

Supply of raw materials to the Mysore Iron Works and the Government Porcelain Factory has become more or less a permanent feature of the work of this Department. Since payment is not received regularly from these departments for the work, a large amount of money has to be spent out of the imprest and often recoupment is effected long afterw This is a serious handicap which the department has ee experiencing every now and then since the balance of imprest available for ordinary expenditure has been found to be inadequate.

Further, the average figure is no criterion for the expenditure incurred during all the months of the year. Especially during the field season which forms a greater portion of the year, the monthly expenditure is very much higher than the average shown and if the imprest is reduced to Rs.300/- as suggested, the work of the department will

will suffer badly. ~~Certain items of geological~~ and mineral survey and inspection work which, with a view to efficiency and economy, will have to be done expeditiously and simultaneously by two or more officers, will suffer seriously owing to a reduced imprest. It has also to be stated that such reduction in the present imprest of Rs.500/- -a sum which has enabled the Department all these years to function on certain well-laid definite lines - will put its normal working out of gear.

In the above circumstances, I request that Government may be pleased to retain the office imprest at Rs.500/-.

Favourable orders are solicited.

I have the honour to be,

Sir,

Your most obedient servant,

Offg. Director,

Mysore Geological Department.
